

Patsy O'Brien Stops Baden Whiteside in Sixth Round In Hard-Fought Battle

According to the box office, over 900 witnessed the big boxing card presented by Frank Donald at the Wapiti arena, on the evening of July 1st.

Patsy O'Brien won a technical knockout over Baden Whiteside in the sixth round of a scheduled ten-round affair.

At the outset of the fight it looked as though Whiteside would make it interesting for the fighting Irishman. In fact, during the first two rounds there were not a few who were willing to place their money on Whiteside.

Both boxers got a good hand as they entered the ring. Whiteside's weight was given at 168 and O'Brien's at 164 pounds.

The first round was even, if anything Whiteside having the best of it. In the second Patsy landed hard to the jaw, which forced Whiteside to take time off.

At the bell in the third Whiteside rushed Patsy to the ropes. Patsy changed punches, Patsy again connecting with the jaw. During the remainder of the round both missed badly.

In the fourth Patsy went in another hard one to the chin and the frequency with which Patsy was landing

on Whiteside's jaw began to tell. In the fifth both fighters were somewhat wild. Whiteside landed hard to the jaw, which forced Whiteside to take time off.

Patsy started in to the fight in the sixth round. Whiteside was on the side of the head. Patsy put over a right cross on his feet and another punch would have put him down and out. Patsy showed splendidly and was able to land a few other blows and walked away. The crowd, however, was not so sure of Whiteside from further damage.

After supper there were three football games, which proved quite exciting. These games were played by the surrounding districts. Whiteside defeated Bear Lake in the first game with the close score of 10-3.

ITALIAN OFFICIALS BUSY PREPARING CANADIAN BASE FOR CHICAGO FLIGHT

For several months Italian officials have been preparing at Shediac, New Brunswick, for the arrival of the great Air Armada from Italy en route to Chicago. Twenty-four seaplanes, under the command of General Balbo, are ready to start any day now on a long flight from Italy across the north Atlantic, landing at Reykjavik, thence to Cartwright in Labrador, and on to Shediac, New Brunswick, where all necessary repairs and refueling will be done. From Shediac the planes, carrying approximately 90 fliers, will go to Montreal and then on to the Chicago World's Fair. On the return trip the Italian airmen will again fly to Shediac and prepare for the Atlantic hop, which will be via Harbor Grace. This picture shows the picturesque bay at Shediac, New Brunswick, while inset is a map showing where the Air Armada first strikes Canada and the two refueling points, Shediac and Montreal.

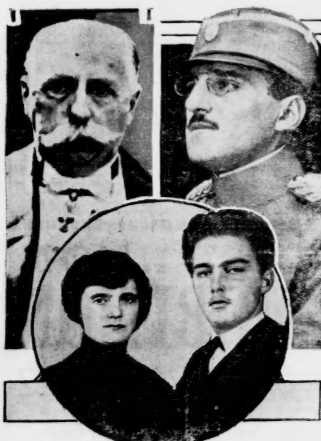

STAR OF THE SEA

There's no excuse for the wild waves being wild at Venice, California, not with the softening influence of Janet Gaynor, petite screen star, being exerted there. She is shown in a beach suit of shorts and sailor jumper, relating between scenes of her new movie.

MOUNTIES' UNIFORM CHANGES IN SIXTY YEARS

This year is the Diamond Jubilee of the founding of the famous Royal Canadian Mounted Police, formerly known as the North West Mounted Police. Organized in 1873 to take the administration of justice into the territories then recently acquired from the Hudson's Bay Company, the North West Mounted Police, then numbering 300, started on the long road to fame. Here we see two pictures of the Mounted Policemen. The top photograph shows a "Mountie" as he looks in his spick and span uniform in 1873. The bottom picture was taken at Fort Walsh in 1873 and shows a group of non-commissioned officers in the uniform then worn.

LEAVES NOTHING TO CHANCE

Electricity keeps Century of Progress officials at Chicago informed as to just what the number of persons inside the grounds is at any time. Turnstiles at the various entrances are equipped with counting and recording devices with a central dial in the cogwheel's office. A glance at the dial tells how many persons have entered the grounds, how many left and what entrances and exits were used. The information is used in distribution of guards and change at entrances. To notify transportation companies when there is a rush from the grounds and at what exits, and to keep concessionaires informed of the size of the crowds so they will not run out of supplies.

SNOW SLIDE VICTIMS

Find Bodies of Two Men Lost Since Last February

Field, B.C.—One hand jutting above rock and melting snow had led to discovery of Chris Dunn, 26, and his brother, Jim, 23, lost in Duchesney Pass since last February. The young men, both residents of Banff, Alberta, were trapped in snow-slides in the pass as they attempted a ski journey from Camp Hector to Field, 34 miles through winding passes. Work parties left here to dig the bodies out of the debris. Discovery of the bodies was made by two Swiss guides, Rudolph Ammer and C. Harner, who were conducting a search of the pass. Searches have been made intermittently since the young men disappeared. A brother, Frank, 20, made trips through the area at every opportunity. Parents of the young men reside at Banff.

LONDON, June 27.—Great Britain was understood in well informed circles tonight to have refused to commit herself to a new European gold bloc scheme under which British and continental currencies would be stabilized irrespective of the desires of the United States. This move, headed by France, was described as an effort to split Great Britain and United States so they would be unable to deal independently on stabilization. Britain's position is that she is for the present "sitting tight."

EDMONTON, June 27.—Although scattered showers fell throughout Manitoba Monday night and early Tuesday morning, rain is greatly yet. Varying amounts of damage from heat and grasshoppers are reported.

MOLEY'S MISSION SETS CAPITAL THEORIZING

Washington is speculating as to the reason for the hurried dispatch of Mr. Moley, United States Assistant Secretary of State, to London. It is thought that while Mr. Cordell Hull, Secretary of State, will continue as official head of the U. S. delegation to the World Economic Conference, his subordinate will direct the delegation's activities. Top above Professor Moley, and lower picture shows the "Big Three" of the U. S. delegation at the conference.

Frankenstein's Monster Without a Soul

At the evening service in St. Paul's United Church, Grande Prairie, on Sunday, July 2, Dr. Dickson, president of the Alberta Conference, gave the following very interesting sermon, the theme of which was, "Frankenstein, is he published in full."

Psalm 127:1—"Except the Lord build the house they labour in vain that build it."

Matt. 10:28—"For what is a man profited if he shall gain the whole world and lose his own soul?"

In the summer of 1816 the two poets, Byron and Shelley, were living near each other on the shores of Lake Geneva. One rainy week they amused themselves reading German ghost stories, and it was agreed upon that each should write a story in imitation of the other.

Mary Shelley, the poet's wife, included in the plan and wrote the most interesting thing that was her novel, "Frankenstein," was the most successful of the three. It is well known of interest, and was recently given great publicity in moving pictures.

Frankenstein was a young student who constructed out of the fragments of dead bodies, a creature of flesh and blood, and the dissection rooms a human being, who he called "the monster."

He loved for love and sympathy but was repulsed by all. He was being full of his own defects and deformities, sought constantly to have revenge on the young student who had called it into being.
